How Relationships  
Impact Growth &  
Development

April 2019

**Dianne Tower** is a speech - language pathologist who has clinical experience and expertise working with infants and children in the areas of connection, regulation, feeding, and communication. She has utilized a family - centered approach in her clinical practice for the past 22 years within a transdisciplinary team framework. Dianne is currently working as a clinical mentor and practitioner in early intervention settings in British Columbia. She is an experienced speaker who has presented throughout Canada and who enjoys sharing her learning and clinical perspectives with families and a variety of professional disciplines.

## Co Regulation to Education: How Relationships Impact Growth and Development

The purpose of this two-day workshop will be to outline the neurological and relational foundations for regulation and learning. The developmental progression of regulation skills and its growth across the early years of life will be presented. The use of attachment-based principles will be explored as the foundation for supporting regulation, optimal growth and development. In addition, risk factors that contribute to and sustain developmental delays will be outlined and discussed. A clinical framework will be presented to provide practical support for monitoring connection and regulation within therapeutic relationships. This presentation will include the use of case studies to provide clinical support for utilizing a cross-disciplinary approach in promoting supportive relationships and optimal development.

COST: \$285.00/participant (tea/coffee, snacks and lunch provided)

When: April 5th and 6th 2019, 8:30 am until 4:30 pm. Registration will be at 8am, April 5th.

Where: Ramada Downtown Plaza Regina

Lunch and snacks provided. Paid parking available.

Rooms are available at the Ramada for the conference.
